Taking health a step further.

PEKANA Introduces DerCution Lotion for Sunburn and Rashes, Daily Care Cosmetic Skin Balm for Dry, Rough Skin

PEKANA has added a pair of topical skin products that are now available from BioResource Inc.

DerCution Lotion

DerCution lotion is an FDA-listed medication with a fluid consistency due to higher water content that makes it easy to apply and spread over large areas, such as the back, arms and legs. The fast-absorbing lotion provides anti-inflammatory and anti-itching effects that can help quickly treat sunburns, rashes, psoriasis and insect bites.

DerCution is available in a 60 gram container.

Daily Care Skin Balm

PEKANA Daily Care Skin Balm is a nourishing cosmetic cream well suited for resolving smaller patches of dry, rough and irritated skin. The higher fat content gives the cream a thicker consistency than the DerCution lotion.

Although this new product can be used anywhere on the body, it is especially useful for daily care of the hands and feet.

Daily Care Skin Balm is available in a 30 gram tube or 200 gram plastic tub.

For more information or to order, contact BioResource at 800/203-3775 or send an email to bioresource@bioresourceinc.com.
